DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 4/22/04 was filed same with the mailing date of the present application on 4/22/04. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

3. Claims 1-12 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a non-volatile semiconductor memory device, in combination with other cited limitations, comprising a peripheral circuit including a memory controller configured to control data read and write in communication with the memory core circuit, wherein said memory controller comprises an oscillator configured to generate an internal clock signal; a timing control circuit configured to control timings of data read and write of said cell array as synchronous with said internal clock signal; and a merge clock generation circuit configured to generate based on an external timing signal and said internal clock signal a merge clock signal serving for timing controlling a circuit portion in said peripheral circuit, said merge clock signal being defined as having a first signal period in which said external timing

signal serves as a clock source and a second signal period without overlapping said first signal period, in which said internal clock signal serves as a clock source as recited in claims 1 and 10.

Claims 2-9 and 11-12 are therefore allowed because of their dependency on claims 1 and 10; respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Sato et al. (US 6,567,319) disclose a nonvolatile semiconductor memory with controlled supply of boosted voltage.
- b. Farmwald et al. (US 6,715,020) disclose a synchronous integrated circuit device having memory controller includes output driver.
- c. Farmwald et al. (US 6,570,814) disclose an integrated circuit device which outputs data after a latency period transpires.
